About GRABO

Did you know that a rock-climbing trip inspired the GRABO? The CEO of GRABO was looking for a better way to scale the rock surface and was inspired to create a powered vacuum tool that could 'Grab' onto uneven, slightly porous surfaces. Ultimately, the GRABO was not developed for rock climbing but found a different purpose in allowing users to safely lift paving slabs, concrete tiles, drywall, porcelain, glass, furniture and more. The GRABO has become an indispensable tool for thousands of tradespeople worldwide who want to get the job done quicker and safer.

What is the GRABO[®]?

The GRABO is a portable electric vacuum lifter used by Builders, Contractors, and Industry Professionals to move heavy or bulky building supplies with ease. With the GRABO you can safely lift paving slabs, concrete tiles, drywall, porcelain, glass, furniture and much more.

What are the benefits of using the GRABO

- ✓ Minimises strain on your body by reducing the risk of sprains, tears and repetitive lifting injuries.
- ✓ Supports a better position when lifting as it allows you to carry weight close to the body, near waist height rather than outstretched.
- ✓ Reduces the risk of dropping heavy objects on fingers and toes, which could cause serious injury.

What is the GRABO[®] suitable for?

Paving and landscaping

Make slabs easier to pick up and carry, the on-top positioning means no more trapped fingers!

Tiling

Minimises the risk of damage to expensive tiles, maximises efficiency and helps with positioning, all while reducing physical workload.

Glazing & Doors

Perfect for glass panels that are thicker than 6mm or use the OTTOVAC by GRABO, the battery powered glass suction cup.

**Use OTTOVAC or Brace Seal for panes of glass under 6mm*

Concrete & Pavers

The GRABO makes lifting and placing paving slabs safer and easier.

Stone Masonry

Moving stone using the GRABO is a breeze especially when used with the Rock Seal attachment that allows variations in height up to 10mm.

Panels & Metal Works

Moving large, awkward panels can be tricky. Utilising two GRABOs makes it easy to carry large materials and can reduce the risk of injuries.

Removals & Installation

Large bulky white goods and furniture do not often come with carry handles, the GRABO allows you to create your own!

Utilities

The GRABO allows quick, easy and safe removal of drain and manhole covers.

GRABO[®]

Pro Lifter 20

The GRABO Pro is the next generation of vacuum lifter tools and is the newest addition to the GRABO range. Ergonomically designed to provide better grip and less fatigue when moving heavy objects, the GRABO Pro comes equipped with a smart digital pressure sensor, digital display and smart settings for both weight and pressure.

- ✓ Lifts up to 170KG
- ✓ Effective vacuum lifter even for dusty, semi-porous or rough surfaces.
- ✓ Smart pressure sensor automatically monitors and maintains optimum suction
- ✓ Digital display shows maximum weight that can be safely lifted at any moment
- ✓ Slimmer, ergonomic handle for better grip and less fatigue
- ✓ 1.5 Hour non-stop running time

GRABO[®]

Plus

Using the GRABO benefits anyone who lifts and moves large or heavy objects, whether it's Pavers working with heavy stones, Tilers making their job more efficient or Removal Companies moving awkward furniture. The original GRABO Plus gets the job done and gives you the same lifting capacity as the GRABO Pro but with manual controls.

- ✓ Lifts up to 170KG
- ✓ Effective vacuum lifter even for dusty, semi-porous or rough surfaces.
- ✓ Manual On/Off button
- ✓ Classic 45mm diameter handle
- ✓ Rubber-protected mechanical pressure gauge
- ✓ 1.5 Hour non-stop running time

NEW OTTOVAC

BY GRABO®

The OTTOVAC is the latest innovation from the makers of GRABO. A robust, battery-powered suction cup, perfect for glass and other smooth-surfaced materials. The OTTOVAC removes the manual pump action on traditional suction cups and replaces it with a small, powerful motor, meaning you're ready to go at the touch of a button.

- ✓ Battery powered, no need to thumb pump to gain suction.
- ✓ Battery suitable for 1500 power-ups
- ✓ Automatic on/off switch to maintain suitable suction while lifting.
- ✓ Gauge to indicate vacuum pressure
- ✓ Built tough with ergonomic steel handle

GRABO[®]

Seals

Standard Seal

When the GRABO seal finally wears out, the lifting capacity diminishes. In this case, you can replace the worn seal by hand within seconds.

Rock Seal

The GRABO Rock Seal is designed to make it easier to pick up rough materials such as rocks, stones or surfaces with variations in height up to 10mm.

Slender Seal

The unique design of the GRABO Slender Seal means it's even easier to grab surfaces with extended, narrow surface areas, such as pavers, long tiles, pipes and more.

NEW Brace Seal

The Brace Seal is a new replacement seal for the GRABO specifically designed for very thin or fragile materials.

With our range of seals your GRABO is the ultimate carrying tool.

Seal Guide

Materials Seals	Tiles	Concrete	Rock	Glass (6mm and over)
 <p>Standard Seal</p>				
 <p>Slender Seal</p>				
 <p>Rock Seal</p>				
 <p>Brace Seal</p>				
 <p>OTTOVAC</p>				

Material densities and porosity can affect the GRABOs suction abilities, check pressure before use.

The seal will work with the material

Best seal for the job

Glass (Under 6mm)	Wood	Sheet Metal	Riven Materials	Pipe & Ducting >160mm dia
